

BELL WOODTURNERS

AUGUST 13, 2009

4-H TURNING CLASS

The July 25th Class was low on attendance with only two students present. With school back in session this month we are expecting better attendance this month. The current project is a three legged stool. Future projects will include a bowl and a pen.

July Club Demo

The July Demo was done by Charles Watson. Charles demonstrated the use of a home-made threading device to make a wooden bolt and nut. This device can be used to make threads on any item turned on the lathe including boxes, bolts, earrings, or any item with two parts that are fitted together with threads..

Demo-Sale Day

The Demo-Sale was on July 11, 2009. Attendance was estimated to be less than last year but we had many people interested in the Demos and in how different items were made. As usual the bow lathe got a lot of interest with Kent Harriss doing a good job of demonstrating it's operation.

July Treasury Report

| | |
|---------------------|-----------|
| Beginning balance | \$3078.15 |
| Deposits & Interest | 184.62 |
| Expenses | 377.45 |
| Ending Balance | \$2885.32 |
